

### COUNTRY PARTNERSHIP PROGRAM

ANNOUNCING the Country Partnership Program where People that Deliver (PtD, through its member organizations, provides a service offering that supports Ministries of Health, NGOs and implementing partners to plan, implement, and sustain reforms which strengthen human resources (HR) for the health supply chain management (SCM). PtD is the “broker of services” whereby it matches country needs with funding and/or PtD members who can supply the service.

Services include:

**Initial scoping**

**Tailored HR for SCM assessment**

**Development of a comprehensive HR for SCM strategy**

**Development of a competency framework**

**Development of a training plan**

Through this partnership program, PtD expects to see increased country engagement and coordination around HR for SCM, and HR for SCM plans/activities/strategies incorporated into Ministry of Health work plans or supply chain strategies. All of which PtD envisions in time will result in country-level supply chain workers who are better equipped to manage their public health supply chains.

**An effective supply chain involves the six rights of supply chain human resources:**

- 1. Engaging the right people**
- 2. In the right quantities**
- 3. With the right skills**
- 4. In the right place**
- 5. Paid the right salary**
- 6. At the right time**
