

People that Deliver's Country Partnership Program is a service offering that supports Ministries of Health, NGOs and implementing partners to plan, implement and sustain reforms which strengthen human resources (HR) for health supply chain management (SCM). PtD functions as the broker of services, matching countries' needs with funding and/or PtD member organizations who can provide the service.

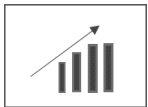

Services include:

INITIAL SCOPING

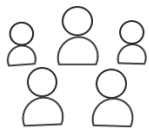

DEVELOPMENT OF A COMPREHENSIVE HR FOR SCM STRATEGY

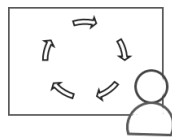

TAILORED HR FOR SCM ASSESSMENT

DEVELOPMENT OF A CAPACITY BUILDING PLAN

DEVELOPMENT OF A COMPETENCY FRAMEWORK

Through this partnership program, PtD expects increased country engagement and coordination around HR for SCM and HR for SCM plans, activities, strategies incorporated into Ministry of Health work plans or supply chain strategies. This supports the PtD Theory of Change which articulates optimization of work performance into increased supply chain performance.

Building Human Resources for Supply Chain Management: A Theory of Change
