- Strengthen last mile vaccine supply chain through advocacy and by leveraging private sector expertise and resources to develop infrastructure
- Develop technology to improve SCM such as cold chain monitoring and mobile application for child registry and stock management
- Support 4 provinces to run a delivery-based logistics system for vaccines, RDTs, and related supplies. Includes identifying and training specialized logistics staff to manage and run delivery routes, collect data, and provide supervision to health centers on vaccine management. Through the USAID | DELIVER Project:
 - Coordinate USAID partners to improve the capacity and distribution of rapid diagnostic test kits.
