LIBERIA SUPPLY CHAIN EXPERIENCE

JOHN T. HARRIS, B.Pharm, R.Ph, MSc.Pharm.Mgt (C)
NATIONAL PHARMACEUTICAL SUPPLY CHAIN DIRECTOR
SCMU/MoHSW
USAID/PEOPLE THAT DELIVER BOARD MEETING
LYON, FRANCE
DATE: FEBRUARY 02 – 03, 2012
OUTLINE OF PRESENTATION

- Introduction;
- The Supply Chain Management Unit Organogram;
- Present status on SCMP Implementation;
- Bottlenecks in the Implementation;
- Recommendations.
INTRODUCTION

- Updates on the status of the year one Implementation of the Supply Chain Master Plan of Liberia.
- Recommendations way forward.
Present Status in the Implementation

First year Successes in implementation:-

- SCMU set up at MoHSW with 4 recruited pharmacy staff – 3 from programs as part time staff (40% inputs to SCMU) and 1 full time staff
- A recruited and trained supply chain database manager.
- SOPs and the LMIS Tools for commodity management developed, and are being rolled out in all counties.
- County pharmacists trained on basic supply chain computer programs for commodity management and data reporting.
- Supportive supervision of commodity management in counties is ongoing.
- New Liberia STGs and National Formulary has been
Present Status in the Implementation

- County monthly commodity consumption reports are being received by the central MoHSW /SCMU.
- SCMU is now coordinating forecasting planning and quantification of commodities.
- Supply Chain management vehicles are now available for commodity managers at county levels in the collection of data.
- A new pre-service training Pharmacy curriculum containing supply chain components has now been developed at the School of Pharmacy, University of Liberia.
- The restructuring of NDS as recommended by the SCMP is ongoing.
- Training of other regional staff on commodity management is ongoing.
BOTTLENECKS 1

- Effective distribution of commodities is still a challenge especially during the rainy seasons.
- The NDS is still incapacitated in term of storage.
- Supply system of MoHSW vertical programs are still partially fragmented since not all programs are on board. Example: EPI, RHD & CHVW Department.
- Limited resources from the MoHSW to procure sufficient quantities of quality essential medicines to address country needs.
- The lack of sufficient empowered supply chain work force at central and county levels.
BOTTLENECKS (2)

- International partners commodity coordinating shipment template still pending finalization
- Service Level Agreement between the SCMU and NDS still pending.
- The SLA is meant to facilitate continuous improvement of the supply chain processes and goals in order to:
  - maintain 100% customer service;
  - increase visibility across the Supply Chain;
  - build relationships between partners;
  - monitor performance between the Partners.
RECOMMENDATIONS TO PtD

- To begin working with Liberia for the survival of supply chain activities through system strengthening.
- To engage Liberia policy makers to continue to prioritize Supply Chain activities.
- To encourage and support Liberia in its SCMU human resource skills development.
- To support Liberia the recruitment of qualify supply chain work force for the SCMU.
“We are committed to a reformed supply chain system in Liberia. A single system that is efficient, effective and that makes possible clear communication between stakeholders. Further, the system must make essential and life-saving commodities available on time and everywhere...”
